-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 June 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-38 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This action is in response to applicant's response filed on June 21, 2004. Claims 1-38, are now pending in the present application. **This action is made final.**

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayduk et al. (U. S. 5,870,452) in view of Bernstein (U.S. 5,583,925).

Regarding claims 1-5, 7, 13-14, 20-21, 25, 29-31, 33 and 36, Hayduk teaches a subscription code service (*69), the system comprising a lookup table (Col. 1, line 59-61) having a telephone number of a subscriber associated with a subscription code of the subscription code service (Col. 1, line 43-61), wherein the subscription comprises at least one character (*).

Hayduk does not teach the subscription code comprises at least three digits with the number of digits not exceeding five. However, Hayduk teaches the subscription code comprises 2 digits. The subscription code comprises at least three digits with the number of digits not exceeding five. This means the subscription code comprises 3, 4, 5 digits. Subscription code that has 3 digits operates the same as one that has 4 or 5 digits. Similarly, subscription code that

has 2 digits operates the same as on that has 3 or 4 or 5 digits. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have a subscription code comprise at least two or more digits to complete the call. In addition, when subscription code has more character it would be easy to have catchy word. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have the characters represent a catchy word, which characterizes the subscriber.

Hayduk does not teach the telephone number is not a variable that depends on the most recent calling party who dialed a telephone number of the subscriber. However, Bernstein teaches the telephone number is not a variable that depends on the most recent calling party who dialed a telephone number of the subscriber (Col. 1, lines 51-58). Bernstein teaches a caller establish a N-way call by dialing a code representing a sequence of speed dial codes respectively associated with the telephone numbers of the conferees that will be involved in the N-way call, rather than dialing each such telephone number. The facility, responsive to receipt of the dialed code, identifies the associated sequence of speed dial codes and places a call to each of the telephone numbers associated with those codes. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate Hayduk's system to Bernstein's system to associates the telephone number with the subscription code so that anyone who dials the subscription code will always reach the same party.

Hayduk further teaches a routing device (Fig. 1, item 14 or 16) in communication with the lookup table (Fig. 1, item 16), wherein when a call initiated by a caller (Fig. 1, item 10) using the subscription code (*69) is received by the routing device, the routing device retrieves the

telephone number from the lookup table, and wherein the routing device terminates the call to a subscriber of the subscription code according to the telephone number (Col. 1, lines 50-61).

Hayduk further teaches presenting to the caller a list of subscribers associated with the subscription code, receiving one telephone number chosen by the caller, and terminating the call using telephone number (Col. 1, lines 50-61).

Regarding claim 6, Hayduk further teaches the routing device is a local switch (Fig. 1, item 12 or 19).

Regarding claim 8, Hayduk further teaches the associating means comprises a database (Fig. 1, items 16 and 17).

Regarding claim 9, Hayduk further teaches the detecting means uses a local switch (Fig. 2, item 12).

Regarding claims 10, 15-19, 22-24, 26-28, 32 and 34-35, Hayduk further teaches the database contains subscriber rules related to which of the at least one subscriber telephone number should be retrieved by the service control point. The subscriber rules are based at least in part upon an originating region (point code, an NPA-NXX, zip code) within which the caller is located, upon a time, a solicitation of a choice from the caller (Col. 1, lines 25-30; lines 50-57).

Regarding claim 11, Hayduk further teaches terminating means uses a local switch (Fig. 1, item 19).

Regarding claim 12, Hayduk further teaches retrieving means and the terminating means are one dedicated switch (Fig. 1, item SSP).

Regarding claims 37 and 38, Hayduk further teaches the presenting step involves a prerecorded announcement, and the presenting and receiving steps are performed by one or both of a service node and the service switching point (Fig. 1, items 12, 14 and 16).

Response to Arguments

4. Applicant's arguments with respect to claims 1-38 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

Or faxed to:

Hand-delivered responses should be brought to

Crystal Park II, Sixth Floor (Receptionist)

2121 Crystal Drive

Arlington, VA 22202

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Le whose telephone number is 703-308-4998. The examiner can normally be reached on Monday - Friday from 8:30 A.M. to 5:00 P.M.

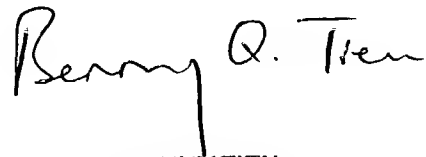

Application/Control Number: 09/995,634
Art Unit: 2642
